

INSTABOOM/SOSEC Tracker

Remote fleet management

Adding the 3G tracker to any INSTABOOM or SOSEC barrier instantly allows full remote management, proactive servicing and email alerts and notifications. Especially important when barriers are operating a safety critical GS6 role, the ability to receive live alerts and locations of over height vehicle breaches becomes an invaluable safety tool.

Key Features:

- Location via GoogleMaps
- Battery voltage
- On/off status
- Up/down status
- Instant trigger alerts by email
- Remote trigger to open/close
- GeoFence grouping
- Daily usage and management reports
