INSTABOOM FLAGGER THE UK'S FIRST SOLAR MICRO-BARRIER

Meet National
Highways
route to carbon
neutral
by 2050

INSTABOOM Flagger, is a portable, remote operated traffic control barrier. Designed to control and eliminate incursions within a temporary works area. **INSTABOOM Flagger** can also provide effective pedestrian or cycle lane control.

INSTABOOM Flagger is fully solar-powered if used in sunlight and a massive 2 weeks of 10 hour shifts, allowing a single operative to deploy it in under a minute and operate the closure from a **position of safety**, up to 800m away, reducing the risk of accidents.

The rugged, mobile, flight case format, weighs just 24kg. The case and quick release pole, with RA2 reflective **STOP** sign and warning flag, can easily be carried and deployed by a single operative from the boot of a car. The closure is then operated by remote control from a safe place.

Optional Flag Accessories

Manage traffic. Improve safety. Cut Carbon.
