

VMS-P UNIQUE, PALLETISED VARIABLE MESSAGE SIGN

MOBILE, PALLETISED MESSAGING

Hire or buy our unique, palletised colour **VMS-P** for inner city and urban works, or for roads with speed zones up to 50mph.

Why we've taken the VMS off the trailer

For decades a **VMS** came on its own trailer - not because it needed wheels, just because that's how it was always done. **VMS-P** changes that. No wheels, no hitch, no trailer to maintain, no flat tyres, no intermittent brake lights.

The **VMS-P**, although small in size, offers a wealth of technology including autonomous solar charging and low power LED display. Designed for deployment with a SOSEC trailer, one trailer can serve many signs, ensuring minimum footprint and flexibility. Reliable under all conditions and offers impact, choice and the use of red, green, blue and white as well as standard amber. Security is enhanced by removing the ability to take the **VMS-P** away so easily - there's nothing to tow.

Key Features

- Full graphics and pictograms.
- Non-glare, UV resistant polycarbonate screen.
- Security features - GPS tracked and padlock covers.
- Highest quality LEDs.
- Solar-powered / environmentally friendly.
- Programming options - laptop on site, modem, SMS, App or Internet.
- Windows / Android / iOS app.
- Delivery from pallet trailer, site forks or hiab.
